Hello , I would like to put something into words about domestic violence against women and children .

I have just spent two weeks watching my niece go through a trial due to domestic violence.

To watch what she went through on a [REDACTED] trial , was absolutely brutal. Everything that has happened seemed to make it look like she was the perpetrator and not the actual victim in this case . It was so heartbreaking to watch someone you love be put through this .

These men seem to have all the rights and women have to fight so hard just to survive .

There was six charges and he was only found guilty on one !!! He is now out on bail . They say he will go to jail , but I do not want my niece to be the next statistic to be added to yet another female hurt or killed .

Please something has to be done to protect women and children from domestic violence .

Thank you for reading my letter.

Kind Regards [REDACTED]
